

IN THE SPECIFICATION

Please replace the title of the application with the following title:

APPARATUS FOR INSTALLING PIN CONNECTORS

Please amend the abstract as follows:

Apparatus, methods and articles of manufacture for pin installation are shown, comprising for installing pin connectors include one or more support surfaces above a pin array. These support surfaces permit a press fit mechanism to install the array by applying a force normal to the pin heads of the array and above the pin tails. A liquid curing to solid such as epoxy may be used to provide the surface. Alternatively a solid surface may be used.
